

Aluminum Intake/Exhaust Shutter

J&D Manufacturing's Aluminum Shutters are designed for air intake or can be used with exhaust fans (both inside and outside). All shutters come complete with tie bar to eliminate shutter flapping and locking open. The heavy aluminum extrusion frame and center bar (36"–60") have welded corners for extra strength. Our shutter series is by far the best value shutter on the market today.

Features

- High efficiency shutter with tie bar to eliminate shutter flapping
- Powered Aluminum Intake Shutters or free-air exhaust
- Nylons bearings; solid shafts; drawn cup-type sleeves on all movable linkage
- Frame of heavy aluminum extrusion with 1/2" channel lock water stop.
- Corners are precision milled and welded for durability
- Interlocking blades for maximum weather seal
- Constructed with rigid "T" section center member
- Optional motorized shutter kit available to turn any shutter into a power shutter

Poly Shutter

J&D Manufacturing's white Poly Shutters are designed for air intake but can also be used with exhaust fans. Constructed of exterior grade white PVC material which does not rust, rot or corrode creating a maintenance free easy to clean shutter. It's aerodynamically designed blades create a smooth operation, less air drag, and a tight seal when closed.

Features

- PVC framework with corner braces, results in stronger shutter construction
- Poly welded corners
- Curved blades assure a tight seal when the shutter is closed
