PolyMax®

PolyMax® Grow Tubes Planting Guide

Polyester PolyMax ® Grow Tube Shown

1 Cut a small hole in the PolyMax® Grow Tube mesh, approximately the size of the plug or root mass of the plant.

2 With your fingers or with any other tool, make a hold in the growing media for the plant.

3 Place the plant into the hole, making sure to cover the plug/roots completely. Lightly pat the growing media around the plant.

Topically water PolyMax® Grow Tube thoroughly upon planting. Water as needed afterwards.
